Dear Lu,

The Antarctic expeditions sounds like a fantastic experience, it's something that remains on my wish list. It would be really great having you visiting in Lund and for the period in late April I am totally flexible. If you have a chance to visit Gediminas in Vilnius you should definitely do that - it is just one hour by air from Copenhagen so easy to combine with Lund. I week is of course short for all the things we could discuss but I'm sure it would be enough for giving you a good idea on what we are doing and possibilities to discuss future joint projects. As I said, I'm flexible with time so if you decide also visiting Gediminas you can first arrange the best time of visiting Vilnius first and then we can coordinate the timing of your stay in Lund.

Hope to see you in April!

Staffan
